ETH zürich

The ETH Domain PHRT frame and objectives

The Strategic Focus Area Personalized Health and Related Technology (PHRT) as defined in the **Strategic Planning 2017 - 2020** by the **ETH Board** will focus on core contributions of the ETH Domain institutions that are **complementary to the efforts** undertaken by other initiatives, such as the Swiss Personalized Health Network (SPHN)

An important goal of the SFA is to allow **ETH Domain** institutions to be in a position to **collaborate** most fruitfully with **partners from SPHN (in particular clinics with their patients)** and with **international programs**.

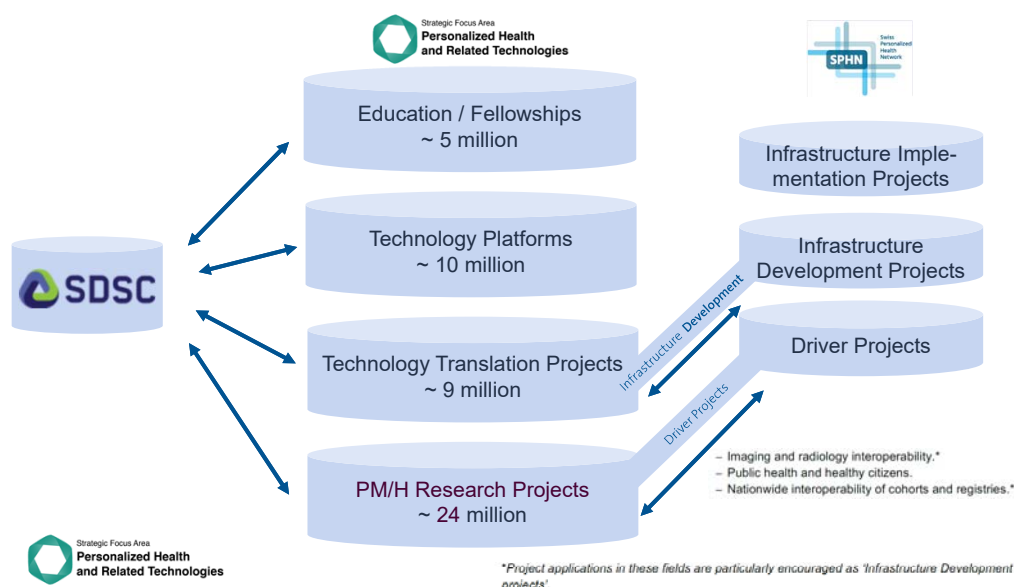

Strategic Focus Area
**Personalized Health
and Related Technologies**

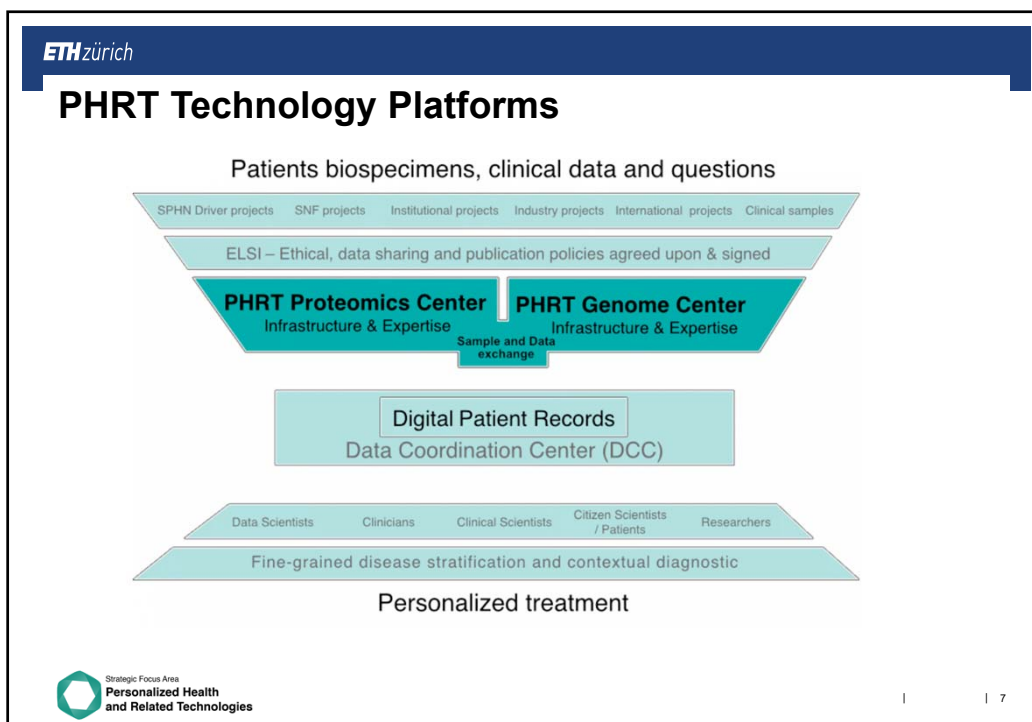

| | 4

Personalized Health and Related Technologies: key points

- Program Period: 2017-2020
- Budget: CHF 50 million
- Executive Committee (EC) is responsible for the program and reports directly to the ETH Board
- Funds awarded based on peer review; no institutional quotas
- Slim administrative structure

PHRT interactions with SDSC and SPHN

Call for Proposals

Documents for the first call for proposals

Please find below the relevant documents describing the project types, requirements etc.
 The templates for submission of a proposal will be available soon.

<p>Overview</p> 	<p>PMPH Research (including Driver)</p> 	<p>Note for joint PHRT-SPHN applications:</p> <ol style="list-style-type: none"> 1. Please submit only one single application file (as PDF or zip) with one common project plan according to the describe rules. 2. For creating the application, applicants can use either the SPHN or the PHRT template for the administrative and research part of the proposal. For the part C (Project resources), applicants are requested to fill in both detailed budget templates (.xls) in order to specify the amount of contribution requested from PHRT and SPHN respectively. 3. Please submit the same application to both programs by June 30, 2018.
